

# Audio Module

The listen-only Audio Module is designed to augment the video image with a sensitive microphone for search, rescue and tactical applications.

## Audio Module Features:

- Adds audio monitoring to any existing Zistos video system.
- Compatible with all WalkAbout<sup>®</sup> models
- Audio Module connects between any cable or pole and any camera.
- Earbud Headphones connect to the A/V connector of the WalkAbout<sup>®</sup> with the supplied WHA Cable Adapter

## Audio Module Construction:

- Omni-directional microphone
- Audio Processor Circuit to amplify low level sounds and compress high level sounds
- Weather-resistant enclosure

## Audio Module Kit (model AAM):

- Audio Module (AAM)
- Two (2) Earbuds (WHP)
- Headphone cable adapter (WHA)
- Storage pouch (not shown)
