PORTABLE VIDEO SYSTEMS

## **Safely Inspect Confined Spaces**

The Zistos Industrial Zoom Inspection System, (Part#: IAD-PSW-A14Z), enables an individual to remotely inspect an area that may be inaccessible or dangerous to enter. The system is ideally suited to perform a complete visual assessment of vaults, tanks, large vessels, voids, and other confined spaces or difficult to reach areas without physical entry.

The system features a submersible, self-illuminating zoom camera that is mounted on a telescoping pole. Images are viewed on a body-worn or tripod-mounted LCD display.

With several camera options and DVR capability, the Industrial Zoom Inspection System increases the safety and efficiency of many industrial inspection tasks.

# Industrial Zoom Inspection System

180 degree (+/- 90 degree) articulation with a twist of the hand grip allowing for vertical and horizontal panning.

- Submersible 10X Optical Zoom for close-up, higher detail images.

14' Articulating, telescoping pole is waterproof and submersible. Poles quickly connect and disconnect from the display; hard wiring provides reliability and security that wireless systems cannot.

WalkAbout® DVR: Body-worn or tripod-mounted 5.6" LCD display and DVR; weatherproof and battery-powered, with on-screen indicators for battery life and LED intensity.

## Recommended Additions:

### Dual-mode & Standard Thermal Camera\*

Locate elevated temperature components through smoke and darkness. Switch to visible light camera for better object identification.

### Additional Poles\*\*

Pole lengths available from 2' to 40' (.7-12M), in both articulating and flex-end extension styles. Available in lightweight carbon fiber (conductive) as 20', 30' and 40' (6-12M), with flex-end only.

### Display Tripod

WalkAbout display can be set up on the tripod with bracket for specific safety needs.

## Call today for a demonstration.
