

Rescue Reel

The Zistos Rescue Reel facilitates victim location and extrication by providing video/audio access into long vertical drops such as elevator shafts, wells, etc.

Rescue Reel Features:

- Aids in expediting the location and extrication of trapped victims caught in long vertical drops such as elevator shaft, well, stairwell, cliff, etc.
- Provides a lengthy hard-wired connection between any Zistos camera and monitor
- 166 feet (50 M) of ultra low loss video and audio signal transmission cable spooled onto one compact reel
- Reel has brake to prevent unwanted turning
- Portable yet extremely rugged to withstand the rigors of rescue missions
- Adapter included to connect the RR166LS from WalkAbout to another WalkAbout
- Compatible with all Zistos systems through **VisionFlex**[®]

Rescue Reel Specifications:

- 166 feet (50 M) of submersible camera cable
