

HD WiFi Video Transmitter

WXMT-WIFI

The Zistos® WXMT-WIFI is a module that attaches to any WalkAbout or StealthSCOPE, and transmits audio/video over Wi-Fi to any ZistosHD tablet, running the ZistosHD Android App. The WXMT-WIFI is programmed as an access point creating its own network, identical to the operation of all ZistosHD Handles.

FEATURES

- Easily attaches to the WalkAbout, StealthSCOPE and ExplorerSCOPE in the field without tools
- Powered from the WalkAbout or StealthSCOPE – no separate battery
- Weather resistant
- Viewed on any ZistosHD tablet running the ZistosHD App
- Although programmed as an access point, the WXMT-WIFI can be reprogrammed in the field, or at the factory upon request, to be a client to another network

WXMT-WIFI

ATTACHES TO THE BOTTOM OF ANY WALKABOUT, STEALTHSCOPE OR EXPLORERSCOPE

ATTACHES TO THE BACK OF ANY WALKABOUT LCD
